-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

This application is informal in the arrangement of the specification. Applicants should review the specification of the US art used and cited in this office action as examples of specifications.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

This claim is narrative in form and replete with functional language. The structure, that is the parts that make up the invention, must be clearly and positively specified and not what the invention does. The claim must be in one sentence form only. Note the claim language of the patents cited in this office action.

### ***Claim Rejections - 35 USC §103***

The following is a quotation of 35 U.S.C. §103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are

Art Unit: 3643

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. §103(a) as being unpatentable over Gidge (US 5,622,004) in view of Hope (EP 0012011 A1).

As to claim 1, Gidge discloses a self watering plant container (Figs. 1-13) comprising a pot (2 and 3 of Fig. 4) divided into upper and lower sections (bottom of 2 in Fig. 4 divides the pot into two sections); soil in the upper section (5 of Fig. 4; col. 3 lines 19-22) and a water reservoir in the lower section (8 of Fig. 4); and, a wick (6 of Fig. 4) in contact with both sections, the wick made of a plastic tube (col. 1 lines 55-60) with peat moss therein (col. 1 lines 49-54). Not disclosed are fill and overflow tubes. Hope, however, discloses a self watering container with inlet and outlet tubes (see abstract and Fig. 1). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the container of Gidge by adding inlet and outlet tubes as disclosed by Hope so as to allow for easy watering without the soil becoming water saturated.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Flasch Jr. and Stadelhofer disclose in the prior art various divided flower pots. Courtright discloses in the prior art a moss wick. Akiyama discloses in the prior art a divided pot with inlet and outlet tubes.
